

# AXKID ONE 2 REHA

## Functions (selection)

Quick & safe installation in 30 seconds – Simply click the seat into the vehicle's ISOFIX-Connectors, unfold the stand base and fix the automatic rebound bar. Done!

Lateral trunk pads can be velcroed precisely to the large velour upholstery for better upper body support

Directed backwards as a safe reboader – the child's head is optimally protected in the event of an impact

Central wheel for adjusting the seat angle by up to 42 degrees, ideal for various activities such as playing, resting or sleeping

## Features

Removable abduction block for a good sitting position, prevents the legs from rolling over

Side impact protection (ASIP) absorbs energy in the event of side collisions. Easily mounted on right or left side.

Headrest that grows with the child, height-adjustable in 12 positions at the back

The sliding seat technology and the Sleep Well System make it easy to adjust the seat to the child's needs

## Accessories

**ADDITIONAL HEAD PADDING**  
provides better support for the child's head thanks to the additional padding insert

**ANTI-ESCAPE-VEST**  
prevents the child from squirming out of the belt

**CAR SEAT PROTECTION MAT**  
with back protects the seat cushion and offers three practical compartments at the front for toys or similar

## Axkid ONE 2 Reha

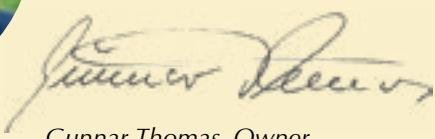

"**Axkid ONE 2 Reha** is the ultimate ISOFIX child seat that allows children with disabilities **to sit backwards up to a size of 125 cm to reverse.**

Thanks to its innovative technology, it particularly protects the child's sensitive head and neck while offering **quick and safe installation in just 30 seconds** - without the need for elaborate belts, which avoids dangerous application errors such as incorrect belt routing, twisted belts or belts that do not fit properly, especially when changing vehicles.

It sets a new standard for rehab-child seats and brings safety and flexibility to the everyday life of families."

Thomashilfen has been supplying special children with rehab car seats for over 35 years. Today, we also use our expertise to develop our own rehab car seats. They incorporate all our many years of experience in meeting the needs of children and parents.

Gunnar Thomas, Owner

**Thomashilfen has the largest range of rehab car seats in the world and offers the right support for all ages and disabilities.**

## UNIQUE FEATURES OF

### Axkid ONE 2 Reha

- Sliding seat technology that gives the best legroom on the market
- Long range safety program – only need for one rear-facing car seat through childhood
- 30 seconds installation guarantee
- Advanced sleep well system with a stepless recline function

REHAB-EQUIPMENT

inclusive:

- Abduction block
- Hip guide pads
- Head cushion
- Trunk pads

#### ASIP side impact protection

- Extra stable energy absorbers on the sides significantly reduce the forces of a side impact.
- Mounted on right or left side.

#### 5-POINT-BELT

Integrated 5-point-belt with central adjuster for quick adjustment of the belt length, practical belt connector prevents the belts from twisting.

Quick fastening without vehicle safety belt.

#### AT A GLANCE

Features an Easy Installation System with 6 self-explanatory installation steps. The reboarder also has an automatic rebound bar with built-in sound that lets you know when the seat is in the optimum position.

Display of the base:

- ➔ green: set correctly
- ➔ red: set incorrectly

#### DYNAMIC LEGROOM SYSTEM

With its unique leg room adjust can fit from ultra compact mode, requiring just 73 cm of space anywhere up to a maximum of 88 cm with maximum leg room. Noting most children will never require that amount of leg room so the seat will rarely require that amount of room. It is the phenomenal feature of the seat that it has absolute flexibility to fit all family set ups and vehicles regardless of cabin size at the touch of a button.

#### FORCE ABSORBING TECHNOLOGY

The geometry of the headrest as well as the choice of material is specially designed to absorb the crash forces before reaching the child.

Headrest is adjustable and can be fitted into 12 positions, allowing full ability to meet the height and comfort needs.

#### PRECISE ADJUSTMENT

To support an improved upper body posture, the lateral trunk pads (1) and hip guide pads (2) can be adjusted to fit your child.

#### AUTOMATIC REBOUND BAR

Eases the installation and ensures the car seat is firmly installed. It ensures the car seat is secure in the event of any type of car crash, including roll-over accidents. Apart from the safety aspect, the automatic rebound bar provides additional legroom and enables an easy installation under 30 seconds.

#### SLEEP WELL SYSTEM

The infinitely variable seat tilt of up to 42 degrees can be quickly adjusted to a resting or sleeping position.

#### Maximum safety – Extra long reversing

The rearward-facing position helps to reduce the strain on the spine when the head is thrown forward during a head-on collision. The force-absorbing technology in the headrest protects the child's sensitive head and neck in the event of an impact.

**When the child is sitting in the reboarder, the risk of serious injury is reduced by 92 percent.**

**The only ISOFIX rehab child seat on the market with i-Size approval up to 125 cm/ 23 kg.**

**Quick & secure 30 seconds installation.**
